Problem statement:

      Our group aims to create a platform that asks users questions related to their interests and personality, assigning a value to each user at the end, based on their category in the quiz, such as a spirit fauna quiz.

Project objectives:
- ★ Create an easily-understandable menu interface for beginners
- ★ Create 3 quizzes that will enrich the user's enjoyment
  - Your Spirit Fauna Quiz
  - Your Spirit Flora Quiz
  - Your Fantasy Background
- ★ Identify their "true" identity
- ★ Have fun! (ᵔᴥᵔ)

Planned Features:
- A menu interface that asks the user which quiz he/she will partake in.
- Once in the quiz, it asks several multiple-choice questions, each with a corresponding numerical value.
- Uses sound effects and background music
- Allows users to partake in the same quiz more than once

Planned Inputs and Outputs:
- For inputs, the user will be given questions such as;
  "Which color is your favorite out of these 4?"

        "A. Red"

        "B. Blue"

        "C. Purple"

        "D. Other"

  Then the user would be expected to answer A, B, C, or D.

- For outputs, after the quiz is completed, the points will be totaled, and based on that, your spirit animal or something else will be shown in a poetic description, along with an image. Ex:

Mirroring Persona

Spirit Animal:

You resemble the Tiger, vigilant and strong.
You observe things with piercing eyes, then execute when
The time is right.

Spirit Flora:

You resemble the spirit of nature; you are balanced and demure
You have a blooming personality, you have the essence of a spirit,
Use your skills wisely.

Fantasy Background:

You resemble the double-faced jester. Balancing the scales
Of both sadness and happiness. Weighed by the pressure
To perform.
